Office Action Summary

Application No.

09/743,762

Applicant(s)

LARSSON ET AL.

Examiner

William H. Matthews (Howie)

Art Unit

3738

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 31-55 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 31-55 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 31-55 have been considered but are moot in view of the new ground(s) of rejection.

Applicant contends that the device of NGK or Cassidy do not teach a moldable or injectable mass. Examiner disagrees because the limitations moldable and injectable are accompanied by "upon admixture with water" and the compositions upon mixing with water are capable of being molded and injected.

Specification

1. The specification is objected to because of references listed in the specification and not in an information disclosure statement. All references listed in the specification should be included in an information disclosure statement. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 31-40,43-50,52,53,55 are rejected under 35 U.S.C. 103(a) as being unpatentable over NGK Spark Plug Co Ltd (JP 2198560) in view of Cassidy et al. US PN 6,280,474. Please note the supplied translation of JP 2198560.

Art Unit: 3738

4. NGK discloses in pages 6-16 (of the translation) a bone composition comprising the claimed forms of calcium phosphate, lipids, biologically active agents such as tissue promoting factors, and phosphatidyl choline or sphingomyeline. NGK lacks the express written disclosure of including a glycosaminoglycan such as sodium hyaluronic acid or that the calcium phosphate granules have a diameter of 0.05-5mm. Cassidy et al. teaches in columns 11-12 bone implant compositions comprising calcium phosphate granules having a diameter of 0.05-5mm and sodium hyaluronate to aid in shape retention of the implant during rehydration. Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the device disclosed by NGK by using calcium phosphate granules having a diameter of 0.05-5mm and sodium hyaluronate to aid in shape retention of the implant during rehydration.

5. Claims 41,42,51, and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over NGK Spark Plug Co Ltd (JP 2198560) in view of Cassidy et al. US PN 6,280,474 as applied to claims 31 and 40 above, and in further view of Larsson et al. US PN 5,196,201.

The bone composition taught by NGK as modified by Cassidy et al. meets the structural limitations of claims 41,42,51, and 54 but lacks the express written disclosure of the lipid in a lamellar floating crystalline phase and the specific ratios between the lipid to water based liquid and calcium phosphate granules to lipid. Larsson et al. teaches in lines 61 of col. 6 through line 31 of column 8 a bone composition having the specific ratios and lipid in a lamellar floating crystalline phase in order to provide a desired consistency. Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the composition

Art Unit: 3738

disclosed by NGK, as modified by Cassidy et al. above, to further included the specific ratios and lipid phase of claims 41,42,51, and 54 in order to provide a desired consistency.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Matthews (Howie) whose telephone number is 703-305-0316. The examiner can normally be reached on Mon-Fri 7:00-4:30 (Every other Friday off).

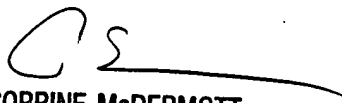

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine M. McDermott can be reached on 703-308-2111. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-2708 for regular communications and (703) 305-3590 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
